

PUBLICATION LIST OF CHRISTIAN EBENBAUER

JUNE 2020

- [1] H.W. Knobloch, C. Ebenbauer, and F. Allgöwer. A framework for disturbance attenuation with discontinuous control. In *15th IFAC World Congress, Barcelona, Spain, 2002*.
- [2] F. Allgöwer, R. Findeisen, and C. Ebenbauer. Nonlinear model predictive control, 2003. Encyclopedia for Life Support Systems (EOLSS) article contribution 6.43.16.2.
- [3] C. Ebenbauer and F. Allgöwer. Minimum-phase property of nonlinear systems in terms of a dissipation inequality. In *Proc. of the American Control Conference (ACC), Boston, USA, pages 1737–1742, 2004*.
- [4] C. Ebenbauer and F. Allgöwer. Computer-aided stability analysis of differential-algebraic equations. In *Proc. of the Symposium on Nonlinear Control Systems (NOLCOS), Stuttgart, Germany, pages 1025–1029, 2004*.
- [5] C. Ebenbauer, R. Findeisen, and F. Allgöwer. Nonlinear high-gain observer design via semidefinite programming. In *Proc. of the Symposium on System, Structure, and Control (SSSC), Oaxaca, Mexico, pages 751–756, 2004*.
- [6] T. Raff, C. Ebenbauer, and F. Allgöwer. Feedback passivation of an electrostatic microactuator: A semidefinite programming approach. In *Proc. of the Symposium on Nonlinear Control Systems (NOLCOS), Stuttgart, Germany, pages 1181–1186, 2004*.
- [7] T. Raff, C. Ebenbauer, and F. Allgöwer. Passivity-based nonlinear dynamic output feedback design: A semidefinite programming approach. In *Proc. of the 43rd IEEE Conference on Decision and Control (CDC), Paradise Island, Bahamas, pages 5409–5414, 2004*.
- [8] C. Ebenbauer, T. Raff, and F. Allgöwer. Passivity-based feedback design for polynomial control systems. *Automatisierungstechnik (at)*, 53:356–366, 2005.
- [9] A. Yonchev, R. Findeisen, C. Ebenbauer, and F. Allgöwer. Model predictive control of linear continuous time singular systems subject to input constraints. In *Proc. of the 43rd Conference on Decision and Control (CDC), Paradise Island, Bahamas, pages 2047–2052, 2004*.
- [10] T. Raff, R. Findeisen, C. Ebenbauer, and F. Allgöwer. Model predictive control of discrete time polynomial control systems: A convex approach. In *Proc. of the Symposium on System, Structure, and Control (SSSC), Oaxaca, Mexico, pages 158–163, 2004*.
- [11] C. Ebenbauer, T. Raff, and F. Allgöwer. A simple separation result for control affine systems. In *Proc. of the 16th IFAC World Congress, Prague, Czech Republic, 2005*. Paper No. 04357.
- [12] C. Ebenbauer and F. Allgöwer. Stability and robustness analysis of Boolean difference equations. In *Institute for Systems Theory and Automatic Control - Internal Reports, 2005*. Available from www.ist.uni-stuttgart.de/reports.
- [13] T. Raff, P. Menold, C. Ebenbauer, and F. Allgöwer. A finite time functional observer for linear systems. In *Proc. of the 44th IEEE Conference on Decision and Control (CDC), Seville, Spain, pages 7198–7203, 2005*.

- [14] C. Ebenbauer and F. Allgöwer. A dissipation inequality for the minimum phase property of nonlinear control systems. In L. Marconi, C. Bonivento, and A. Isidori, editors, *Advances in Control Theory and Applications*, volume 353, pages 71–83. Springer Lecture Notes in Control and Information Sciences, Springer Verlag, 2007.
- [15] C. Ebenbauer and F. Allgöwer. Stability analysis of constrained control systems: An alternative approach. *Systems and Control Letters*, 56(2):93–98, 2007.
- [16] C. Ebenbauer, T. Raff, and F. Allgöwer. Certainty-equivalence feedback design with polynomial-type feedbacks which guarantee ISS. *IEEE Transactions on Automatic Control*, 52:716–720, April 2007.
- [17] C. Ebenbauer, T. Raff, and F. Allgöwer. A duality-based LPV approach to polynomial state feedback design. In *Proc. of the American Control Conference (ACC), Portland, USA*, pages 703–708, 2005.
- [18] C. Ebenbauer, J. Renz, and F. Allgöwer. Polynomial state feedback and observer design using non-quadratic Lyapunov functions. In *Proc. of the 44th IEEE Conference on Decision and Control (CDC), Seville, Spain*, pages 7587–7592, 2005.
- [19] C. Ebenbauer and F. Allgöwer. Polynomial control systems: Analysis and design via dissipation inequalities. In *Proc. of the 7th Chemical Process Control Conference (CPC), Lake Louise, Canada*, 2006. CDROM.
- [20] C. Ebenbauer. *Polynomial Control Systems: Analysis and Design via Dissipation Inequalities and Sum of Squares*. PhD thesis, University of Stuttgart, 2005.
- [21] T. Raff, C. Ebenbauer, R. Findeisen, and F. Allgöwer. Remarks on moving horizon state estimation with guaranteed convergence. In T. Meurer, K. Graichen, and E.D. Gilles, editors, *Control and Observer Design for Nonlinear Finite and Infinite Dimensional Systems*, volume 322, pages 67–80. Springer Lecture Notes in Control and Information Sciences, Springer Verlag, 2005.
- [22] T. Raff, C. Ebenbauer, and F. Allgöwer. Nonlinear model predictive control: A passivity-based approach. In *Proc. of the International Workshop on Assessment and Future Directions of Nonlinear Model Predictive Control (NMPC05), Freudenstadt-Lauterbad, Germany*, 2005. CDROM.
