

Annex 6 to the Addendum for Double Master's Degrees between Chalmers tekniska högskola and Universität Stuttgart

Double Master's Degree Scheme

The attached MACROPLAN depicts the 2-year MSc double degree structure in **Systems, Control and Mechatronics at Chalmers** and in **Technische Kybernetik at U Stuttgart**. It shows the compulsory and elective courses in each semester as well as the prerequisites for students wishing to spend their 2nd year at the partner institution.

Elective Course or Spezialisierungsfach has to be chosen so that "Model-based Development of Cyber-Physical Systems" is accounted for by Chalmers unless EZDV had been taken previously in the Bachelor's Programme at US

US students must choose during Semester 1 to Semester 3 one course on "Discrete Event Systems", three courses from "Area of Specialisation 1", and two from the "Area of Specialisation 2".

US students must choose either "Autonome Systeme und Regelungstechnik", "Systemdynamik" or "Mathematische Methoden der Kybernetik" as one of their "Area of Specialisation".

Chalmers students must choose one "Elective course" from course packages, all three semi-compulsory courses that have to be taken are already covered by courses marked with (SC).

Course code: C = compulsory; E = elective; SC = semi compulsory
